

Double-sided DIY Printed Circuit Boards

Phenolic Bakelite PCB with Pre-Drilled Holes for Easy Soldering - Ideal for Electronic Projects.

- Hole Pitch: 2.54mm
- Hole Diameter: 1.0mm
- Color: Brawn
- Universal single-sided PCB

Perfect for Makers & Engineers

Tailored for makers, engineers, and hobbyists, this solderable breadboard is an essential tool for building custom electronics and DIY projects.

Ideal for Prototyping and Repair

Whether you're designing circuits from scratch or repairing existing PCBs, this board offers a reliable, solderable surface—perfect for prototyping, testing, and troubleshooting.

Durable & High-Quality Construction

Featuring a premium solder finish, this breadboard ensures excellent conductivity, corrosion resistance, and long-lasting durability for all your electronic builds.

PART#	DESCRIPTION			
	Size(cm)	Thickness	Material	Pitch (in)
PCB-10X15 FR4-2	10X15	1.6mm	FR4	0.1"
PCB-7X9 FR4-2	7X9	1.6mm	FR4	0.1"
