

4P4C

Product Overview

Designed for crystal-clear voice transmission and dependable performance, these **4P4C RJ11 modular plugs** are ideal for terminating coiled handset cords in telephony systems. Their flat stranded cable compatibility makes them a go-to solution for fast, accurate terminations.

Key Features

- **Reliable Performance:** Optimised for handset cord termination in telephone and communication systems.
- **Gold-Plated Contacts:** Choose from 50µ", 30µ" or 15µ" for enhanced conductivity and corrosion protection.
- **Tailored for Flat Stranded Cable:** Engineered to provide a tight, accurate fit every time.
- **Flexible Options:** Available in packs of 5, 20, 50, 100 or bulk for every scale of installation.
- **Clear Housing:** Transparent design simplifies inspection and installation.
- **Universal Compatibility:** Suits stranded or solid conductors and flat or round cords.

Neat & Professional: Packed for easy identification and consistent job-site handling. •

Premium Materials: Durable design built to meet telecom-grade requirements. •

Part of a Full Range: Compatible with our wider modular plug lineup. •

Lifetime Warranty: Backed by Access Communications' trusted limited lifetime coverage. •

Product Details

These modular plugs deliver high-performance terminations for 4P4C (RJ11) flat stranded cable, typically used in handset cords. Available with your choice of gold plating for the right balance of performance and cost, they're manufactured to strict specifications and packed in a convenient 20-unit format. Whether you're handling small jobs or large rollouts, these plugs are designed to make terminations quick, tidy, and dependable.
