

18 Holes WRAP-ID labels for WIRE WRAP

Description

I.D. Tags for Wire Wrap Sockets

18 Pins

0.3" row spacing

Each pin is numbered to easily identify them before wire wrapping

Simply slip the tag on the pins of a wire wrap socket after inserted into a breadboard

The outermost holes are smaller, gripping the pins to ensure it doesn't fall off

You can also write on the tags to easily identify location, function, IC Part #, or more
